His first robot,
your first robot.

Easykleen, your first robot

AstralPool, in collaboration with Maytronics, a leading and pioneering company in the manufacture of robots, present **the Easykleen**. An easy-to-use electronic pool cleaner at an affordable price.

Why should you be the one who cleans the pool when a robot can do it for you?

Thanks to its logical scanning system, the Easykleen works autonomously and scrubs and vacuums the bottom and lower part of the pool wall in only 3 hours.

The Easykleen is suitable for in-ground or above ground residential pools up to 12 m long.

Its large filter capacity and thin porosity (70 microns) collects even the finest dirt.

Just plug it in, start it up and forget about it leaving you to enjoy your free-time to the max!

Saves time. In only three hours it scrubs and vacuums the bottom and lower part of the pool wall.

Comfort. No installation necessary. It is small, lightweight and easy to handle.

No need to worry. It operates totally autonomously and is auto-programmable.

Safety. It operates at low voltage and is subject to a strict inspection.

Affordable. With the Easykleen, the robot technology is within reach for everyone.
